INTERIOR

This Interior Collection has a great variety of styles from modern, transitional to traditional and country. We have large products for grand settings to practical and decorative pendants and flushes for more compact dwellings. We have something for everyone.

Model shown: KL-CITY-LOFT-P-M

The soft-modern City Loft features Etched White Opal glass and a Polished Nickel finish.

CITY LOFT

KL-CITY-LOFT1

KL-CITY-LOFT-P-M

| KL-CITY-LOFT1 | 1 lt Wall Light | 435mm | 137mm | - | - | 128mm | Polished Nickel | 1 x 60W E27 |

 $^{\scriptscriptstyle 11}$ Supplied with 2 x 152mm & 2 x 305mm rods.

Model shown: FE-RUBIN-ISLE

The clear, faceted glass shades of the LED Rubin lighting collection serve as the central design element and add a romantic elegance and sparkle to these contemporary fixtures. A clean, sleek look is achieved with round and rectangular chandeliers which will be perfect in a foyer, living or dining room. Or a more playful, fanciful statement can be made by clustering pendants together to create a look that's reminiscent of a floral bouquet.

RUBIN

FE-RUBIN-ISLE

| Code | Description | Height | Width | Min. Drop | Max. Drop | Projection | Finish | Max. Wattage |

Model shown: FE-PAVE-P-M & FE-PAVE1

Inspired by the craftsmanship of fine jewelry, a Crystal inlay is coupled with the Polished Nickel finish and White Shantung Silk shades in each fixture of the Pavé lighting collection to add sparkle in an unexpected way. This transitional design delivers vibrant elegance to any room's design without overpowering the rest of the beautiful décor.

PAVE

FE-PAVE-P-M

 $^{\circ 1}$ Supplied with 1524mm. $^{\circ 2}$ Supplied with 3 x 305mm & 1 x 152mm rods.

ADONIS, DURY & STEWART

Adonis has clear, water glass surrounding another opal etched glass and a soft, clean relaxed country design makes this distinctive double glass treatment a unique pendant with its warm Dark Cherry finish. Dury is a 4lt pendant chandelier with a wire cage finished in an aged silver leaf. A classic hanging pendant, Stewart is simple lighting done right. The clear glass bowl maximises light output and is available in a Western Bronze finish.

QZ-ADONIS-P

QZ-STEWART-WT

| Code | Description | Height | Width | Min. Drop | Max. Drop | Finish | Max. Wattage |

| | | | | | | | |

^{*1} Supplied with 2438mm. ^{*2} Supplied with 1219mm.

This fresh contemporary collection from Elstead Lighting is a great choice for a chic home or contract application. The white polycotton shades have white acrylic diffusers and the simple architectural frames are finished in Brushed Nickel. The wall light has double directional LED spotlights, each with individual switches.

BELMONT

Bespoke shade options available

BELMONT-TL

| Code | Description | Height | Width | Projection | Finish | Max. Wattage |

¹¹Each integrated 1W LED = lumen output 120Lm, colour temperature 2800-3000k, 30,000hrs.

Model shown: QZ-SUTTON-PLACE6

Sutton Place is a desired location for some of the wealthiest residents of New York. Optic glass accents and Milano fabric shades complement the Imperial Silver finish. This collection is fittingly discrete, elegant yet sophisticated.

SUTTON PLACE

| Code | Description | Height | Width | Min. Drop | Max. Drop | Projection | Finish | Max. Wattage |

| *1 Supplied with 2438mm | 1. | | | | | | | |

Model shown: QZ-THEATER-ROW6WT

Theater Row is a perfect circle tooled in an elegant way unlike any other item on the market. Alongside the exposed bulbs, for which we suggest our 8W LED Edison style bulb for best effect, there is a central spotlight on the ceiling fittings. Available in two finishes; Imperial Silver and Western Bronze, Theater Row brings old New York elegance to lighting.

| Code | Description | Height | Width | Min. Drop | Max. Drop | Finish | Max. Wattage | | | |
|--|-----------------------------------|--------|-------|-----------|----------------------|-----------------|---------------|--|--|--|
| QZ-THEATER-ROW6IS | 6 lt Chandelier - Imperial Silver | 737mm | 711mm | 937mm | 1837mm ^{*1} | Imperial Silver | 6 x 60W E27'2 | | | |

 $^{\circ 1}$ Supplied with 2 x 150mm & 2 x 300mm rods. $^{\circ 2}$ Supplied with 3W LED G9 bulb = 300Lm, 3000k.

Charlotte is an updated traditional design featuring a richly textured off-white fabric shade captured by wide solid metal uprights and trim rings. The domed bottom diffuser is captured inside a heavy trim ring and held by cast decorative knobs for a refined vintage touch.

Hampton is a modern transitional design, offering the ultimate in urban sophistication. The minimal rectangular frame, paired with a decorative acrylic etched bottom lens, is softened by a contemporary off-white linen drum shade.

CHARLOTTE & HAMPTON

¹¹ Supplied with 3048mm of chain.

SONOMA VALLEY

This traditional chandelier brings an American interpretation to designs inspired by the undulating and curvaceous vines of the great vineyards of Europe. Like French Country antiques of the early 1900s, these pieces have gracious details and beautiful appointments, that are highlighted with the Aged Tortoise Shell finish.

With both masculine and feminine influences, the transitional Botanic lighting collection by Feiss is a study in contrast. The spun metal drum captures the richness of an antique patina with natural variations. Then, elevating the piece is a dynamic Clear Pressed glass diffuser with a subtle floral gesture, which is then highly polished to generate breathtaking sparkle for a wholly modern look.

38 | www.elsteadlighting.com

The Nico pendants feature a cage profile with dramatic geometric flair. Clean lines seamlessly transition into curves, which all meet at a perfect point by using superior hand-welding techniques. The exposed bulbs are central to the design, so Edisonstyle LED bulbs are a perfect choice. Finished in Chrome.

AUDRIE, BLUFFTON & KATERINA

The Audrie pendant marries a glamorous Hollywood regency silhouette with modern LEDs nested in the vertical body frames, emitting a warm glow from the kinetic, mobile-like pendant. The Blufton 3 light pendant has an industrial inner shade that gives a dark ambient light when used with Edison style lamps. The Katerina is truly a work of art, with two architectural arms securing a crystal-like glass and a cleverly concealed light source, for an ultimately sophisticated design. Features a sleek backplate.

KITCHEN

The use of decorative light fittings in the kitchen has become a common choice as part of the overall design. This collection shows our most commonly chosen models used in kitchen spaces, breakfast bars and serving areas, most of which are transitional and vintage based styles. They are also often used in bars and restaurants as the majority of pendants are height adjustable to maximise versatility.

PROVENCE GRANDE WALL/ PENDANT

This Grande fitting is flexible with three adjustable knuckle joints and is suitable for either a wall or pendant application. The Provence range is offered in a Polished Copper finish.

PV-GWP-CPR

Harking back to period-inspired, warehouse lighting, the Cadence collection is a contemporary update to historic industrial fixtures. The riveted centre band, as well as the vented top and square linked chain on the pendants add rich, visual interest yet don't distract from the clean lines of the overall silhouette.

URBAN RENEWAL

These fittings are influenced by what were seen as functional and industrial lamps of the 1900's. The lamp cage, once a safety feature, now evokes a stylish vintage feel. Using Edison style lamps, they are ideal for use in restaurants, bars, kitchens and anywhere that suits a more heavy duty looking fitting.

BRYNNE & BESO

The Scandinavian-influenced Brynne pendant from Feiss, blends innovative LED technology with a minimalist silhouette. Brynne comes with two sets of fitters in either Chrome or Burnished Brass to allow you to create a customised look. The Beso pendant is a retro 1970's style made from spun steel, painted white internally. The fitting is supplied with ample cable, enabling it to be located in both high and low ceiling situations.

BATHROOM

This stylish range of products has been specifically designed for use in the bathroom environment, although they can also be used elsewhere within the home. Offering a choice of both classic and transitional designs, these fittings will add style and elegance to any bathroom setting. All of these products are IP44 rated, which is the water ingress rating required in many countries for bathroom lighting, making them suitable for Zones 2 and 3. G9 LED lamps are supplied with all fittings listed with G9 lamp holders.

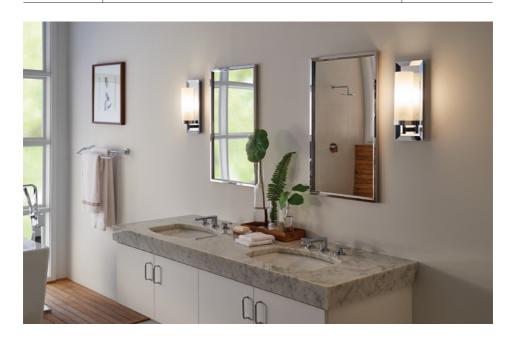

K-LANZA3-BAT Page 189

The Maddison bathroom wall light has clean, elegant lines. A cast metal detail sits between the Opal Etched glass shade and the thick, clear crystal detail at the base of the light. IP44 bathroom rated. Taking traditional inspiration, the Pippin bathroom light has a backplate with classic lines, nicely framing a White Sugar glass shade. IP44 bathroom rated and supplied with a G9 LED lamp.

Tiffany by Quoizel

Today, the name Tiffany is synonymous with products featuring stained and art glass pieces, copper foiled together, and particularly light fittings that benefit the beauty that the electric light bulb does to these when lit. Quoizel provides a range of looks that capture the Tiffany spirit; from highly traditional and transitional styles to more contemporary interpretations sure to suit any modern-day décor. Whether you are looking for deep jewel tones and intricate patterns to serve as a statement piece in your home or whether you seek a light, neutral palette that offers the beauty of stained glass as a subtle complement to your room décor, Quoizel has many Tiffany style art glass lamps and lighting fittings that will suit your needs perfectly.

LANDSCAPE

COLLECT & CONNECT

Garden Zone

The **Garden Zone Collect** & **Connect** system is incredibly simple and safe to use, allowing up to 12 fittings to be connected together over a distance of 30m. With a comprehensive selection of fittings, you will find the ideal solution for any landscaping requirement. These fittings are guaranteed for 5 years against structural failure and the LED modules are guaranteed for 2 years.

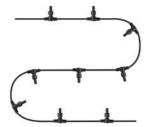

ς YEAR

The bright way to light up your garden!

The Garden Zone Collect & Connect low voltage, energy saving lighting system is a great way to add style to any garden landscape. The system uses high power LED lights offering excellent light output with exceptionally low energy consumption. A wide selection of stylish light fittings including ambient, spot and deck lighting options are available. In such case, a Starter Kit can be purchased with the option of adding additional fittings if required.

PLEASE NOTE

Garden Zone Collect & Connect cannot be mixed with the Garden Zone Professional range.

PROFESSIONAL COLLECTION

GardenZone

PROFESSIONAL COLLECTION

LANDSCAPE AND GARDEN LIGHTING

The Garden Zone Professional Collection offers a versatile selection of high quality, easy to install and energy efficient products for all parts of the garden landscape, designed for use by professional gardeners, landscapers and architects.

Using our excellent low voltage plug & go system allows a large number of fittings from the Garden Zone ranges to be connected together over a distance of up to 80 metres. Furthermore, all the fittings within the plug & go series use LED light sources, which have very good light output properties alongside exceptionally low energy consumption. Added to this we offer a complementary range of 240V energy efficient models in matching designs as well as range accessories to ensure the widest possible choice.

PLUG & GO: HOW IT WORKS

Step 1: Choose the areas you want to have lit, then we suggest that you sketch a rough plan view of each area involved.

Step 2: Choose the fittings which will suit the requirements and list them out with the quantity of each where relevant. Be careful to bear in mind the voltage of the fittings chosen. All 240V fittings will need mains supply to wherever they are to be installed whereas all plug & go models just need to be connected into the low voltage cable (as shown right).

Step 3: Measure the distance involved for the plug & go models chosen and determine, from the cable set options available which cable set or sets will be needed. Remember, up to 80 metres of cable can be used from 1 LED driver but the wattage loading must not exceed the recommended minimum, maximum (see accessories page 279).

Step 4: Plan where the mains supply will originate from. With the plug & go system you have a choice of placing the LED driver/drivers in an IP rated wall box on an exterior wall. However, depending on how large an area is involved, sometimes more than one mains feed may be needed in different locations. Consultation with an electrician is advisable on this matter.

Important

The Garden Zone Plug & go fittings use a unique single pin, 2 pole plug and as such are not compatible with any other product or system. Currently they are not dimmable but they will work when wired via a timer.

Guarantee / Life Expectancy

All Garden Zone fittings are guaranteed against structural failure for 5 years and 2 years for the LED units. The LED lamps have a minimum life expectancy at 80% plus efficiency for 20,000 hours. Typically if on 4 hours per day, 365 days per year, than this equates to around 14 years of life. The 2 year Guarantee is only valid when exclusively using Garden Zone cables, fittings and drivers.

Repair Service

Outside of the 2 year Guarantee we offer a chargeable full maintenance and repair service to fittings. This is conducted in our own workshops and the service includes replacement material parts and wiring repairs.

BRONZE - PROFESSIONAL RANGE

It is not often that one can find products made to original styles and to original quality levels like in the old days. Our Bronze family is our premium range of products that we believe achieves this. They are manufactured from heavy cast bronze (except models Bronze9 and Bronze20 which are produced from solid natural copper)* and chemically treated to give a natural looking Aged Bronze or Verdigris finish .**

Garden Zone

All of these classic designs are supplied with our 12V plug & go system using high power LED's making them energy efficient, yet easy to use and install.

LED LAMPS

The Litec range of LED lamps are optimised to suit Elstead Lighting products. They all feature a high lumen output, and the filament style bulbs have the added bonus of looking attractive both when switched on and off. All lamps have an A+ Energy Rating and are guaranteed against failure for 2 years.

N.B. All lamps are UV free, suitable for 220-240V.

N.B. All lamps are UV free, suitable for 220-240V.

PRODUCT WARRANTIES/GUARANTEES

GENERAL 2 YEAR GUARANTEE. All fittings supplied from this catalogue, both interior and exterior, have a manufacturer's minimum guarantee of 2 years. This means that in normal and fair service, (and without incorrect or inappropriate installation or location), any product sold by Elstead Lighting or its partners should have no fault develop within a minimum of 2 years from purchase. Any fault that is found is covered by guarantee to be repaired or replaced at the suppliers cost, within this period.

ALL Elstead warranties/guarantees do not cover out of pocket expenses or consequential costs.

LIMITED LIFETIME WARRANTY - This warranty relates to certain ranges/models shown in this catalogue which are produced of materials that have an exceptionally long life expectation, such as solid brass lanterns. These fittings may age over time, but will not deteriorate to an extent where they will no longer function for the purpose intended. The "Limited" element relates to component parts such as rubber seals, lampholders etc. which are repairable but are not covered by the Lifetime warranty.

15 YEAR WARRANTY AGAINST STRUCTURAL FAILURE - Those models listed as having a 15 year warranty are guaranteed, that from purchase to within 15 years of normal use, the fittings will not deteriorate to any extent where they experience any structural failure. There may be signs of aging, corrosion or paint fading, but the integrity of the construction of these fittings means they will not deteriorate to any extent where they are rendered unusable within a lifetime of 15 years.

2, 3, 5, AND 10 YEAR ANTI-CORROSION GUARANTEES - Many outdoor fittings have anti-corrosion guarantees stated on each relevant page. This guarantee relates to the corrosion of paintwork on cast aluminium or steel fittings, and excludes locations within 5 miles of the coastline. Fittings that have been damaged, repainted or cleaned with an aggressive cleaner may be excluded.

Prior to agreeing to replace any fittings, the company reserves the right for the original seller or a representative of the company to inspect the damaged parts and for photographic evidence to be supplied.

COASTAL COLLECTION 20 YEAR GUARANTEE - These fittings are designed to be placed in the toughest of conditions including right by the coastline without exclusion. This guarantee covers protection of the finish against corrosion or UV degradation.

COASTAL COLLECTION 5 YEAR ANTI-CORROSION GUARANTEE - This guarantee relates to the corrosion of paintwork on composite parts. In the instance that fittings have been damaged, repainted or cleaned with an aggressive cleaner they may be excluded from the entitlement to a replacement. Prior to agreeing to replace any fittings, the company reserves the right for the original seller or a representative of the company to inspect the damaged parts and for photographic evidence to be supplied.

LED MODULE AND PIR SENSOR GUARANTEES - Within this catalogue there are a number of products incorporating PIR sensors or LED modules. Whilst the fittings themselves may have varying physical guarantees against corrosion, these electronic parts are covered by a 2 year guarantee against failure. After this period, they are still repairable and serviceable, either by the company or local supplier.

GENERAL NOTES

1. FINISHES. Many of the finishes used on these ranges are hand applied (patinated) and some small variations and irregularities in the finish are to be expected. This is part of the process of manufacture and, far from being a problem, it is an important part of the nature of hand made and hand finished items.

2. LAMP-HOLDER TYPES. Most fittings are constructed with either E14 lamp-holders (small Edison screw, sometimes referred to as SES or with E27 lamp-holders (standard Edison screw, sometimes referred to as SES. Appropriate E14 and E27 lamps are widely available in a range of styles, wattages and lights sources including incandescent, compact fluorescent and LED. Some of these lamp-holders are now supplied with threaded skirts, together with candle tubes and shade rings. This means that these products can be used either as a fitting with candle tubes and candle lamps, or with glass using the shade ring. Additionally we make certain fittings which use G9 and GX53 lamps. Lamps are usually supplied with these fittings.

3. WATTAGES. Most fittings shown in the catalogue are shown with Maximum Wattage recommendations. These recommendations are calculated mainly by heat capability, as there is a correlation between heat and wattage. However, in many countries traditional incandescent lamps, such as 100W GLS are no longer available. There are now many new versions of lamps in the market, lower wattage but similar light performance such as halogen replacement, compact fluorescent and LED. Most fittings wattage capacity and certification has been based on the criteria using an Incandescent lamp and so when choosing lamps, please take care to ensure that wattages specified are of no more than the equivalent original incandescent lamps. In the case of LED, the wattages are far lower, but some of these can still run very hot, not dissimilar to incandescent of much higher power.

5. FLUSH CONVERT/DUAL MOUNT. A few of the chain models are constructed so that they can be easily modified from a chain fitting into a semi-flush fitting. Note that once converted to semi-flush it is not then possible to easily convert back to a chain fitting, as some re-wiring is likely to be required.

6. CUSTOMISATION. Some of our ranges supplied in matt black can be relatively easily patinated into finishes such as Black/Gold, Black/Copper etc. Equally, for chain suspended fittings that need extra chain and cable, these can also be relatively easily undertaken. Both such modifications may incur longer lead times and will have small additional costs added to the price. (See current Elstead Terms and Conditions.). Beyond this, with appropriate lead time and client budget, more specialised changes can be undertaken such as different colours completely, changes to dimensions and design modifications and even fully bespoke fittings can be considered due to our varied manufacturing resources available.

EXTERIOR FITTINGS

 INSTALLATION CARE AND MAINTENANCE. When installing all outdoor lights it is recommended to lightly grease all threaded parts and screws / nuts to ensure that fittings can easily be disassembled for cleaning or lamp replacement. When handling certain fittings / finishes such as polished copper they can easily finger mark, so it is recommended that bare hands on these surfaces is kept to a minimum. Please retain receipt and installation instructions for future reference.

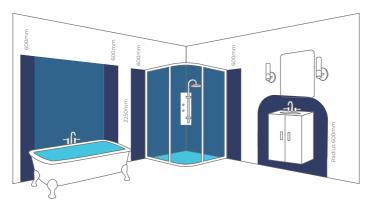

2. FINISH MAINTENANCE. Many of our fittings are supplied in a natural finish, i.e. Polished Copper un-lacquered and Teak wood. These fittings

can naturally age over time or to maintain their original appearance, treatment is needed, such as oil for teak, beeswax for brass and light oil for Copper and Stainless Steel. When handling finishes during maintenance, small marks may show which can be easily polished away if required. The alternative is to allow the material to age and weather naturally, which does no harm to the fitting. Additionally, when installing cast aluminium fittings, a light coating of beeswax or oil can give the finish extended life, especially when in coastal areas. For all models, we highly recommend that exterior fittings are cleaned once per year with fresh water and oiled or waxed to give longer service. Lenses and glasses also benefit from cleaning but take care with polycarbonate or acrylic as these materials can easily scratch if any abrasive cloth is used.

3. IP RATINGS. All exterior fittings have an IP (Ingress Protection) rating which is a declaration of how much protection any product has against the ingress of both water and dust / particles. The minimum rating for an outdoor luminaire exposed to rain should be IP23 and the maximum can be up to IP68 (this can vary in different countries) which means the fitting is submersible. Most of our fittings are IP44 or greater and some of the Landscape models are up to IP67 meaning they can be covered by water up to a depth of 150mm, such as in-ground lights. See table below for full classifications. Typically, the higher the numbers, the higher the performance.

BATHROOMS

Some of the products featured in this catalogue state an IP rating such as IP44. The term IP stands for Ingress Protection and relates to the product's ability to protect electrical parts from ingress of moisture and water. In particular, this is relevant for products being used in Bathroom locations. For installation and compliance purposes, bathroom spaces have been divided up into zones 0 to 3 and this diagram shows how lighting in a Bathroom should be planned based on these zones.

| 1st | Short Description | 2nd | Short Description |
|---------------------------------|---|---|--|
| Digit | (Protection against ingress of solid bodies) | Digit | (Protection against ingress of moisture) |
| 0 1 2 3 4 5 6 | Non-Protected Protected against solid objects greater than 50mm dia. Protected against solid objects greater than 12mm dia. Protected against solid objects greater than 2.5mm dia. Protected against solid objects greater than 1mm dia. Dust-protected Dust-tight | 0 1 2 3 4 5 6 7 8 | Non-protected Protected against dripping water falling vertically greater than 50mm diameter Protected against dripping water when the Luminaire is tilted up to 15° from its normal position Protected against spraying water falling on the Luminaire at any angle up to 60° from the vertical Protected against splashing water from any angle Protected against start jets from any direction Protected against immersion in water under defined conditions Protected against continuous submersion under manufacturers specified conditions |

COMPLIANCE/APPROVALS

All products within this catalogue conform with the European Union Low Voltage Directive, BS EN 60598-1:2008, the product standard for luminaires recognised across Europe and all fittings are CE marked. Every luminaire is individually tested by Elstead Lighting to ensure that the product is electrically sound and meets the company's quality standards. A unique test / batch number is then applied to the fitting. Please contact us for further details or advise us of your local needs.

We are manufacturing members of the UK Lighting Industry Association and conform to all aspects of the Lighting Industry Association Code of Practice for luminaire production.
